

INTEGRAL ENGINE-COMPRESSOR RECONFIGURATION

AJAX™ TWO-CYCLE INTEGRAL ENGINE-COMPRESSORS

Ajax integral engine-compressors are renowned for being low-maintenance, durable machines that operate for decades.

Compression requirements change as a result of:

- › Natural gas demands in the market
- › Changes in site conditions
- › Relocation of equipment
- › Changes in compression applications

As a result of these changes and legacy Ajax equipment, Cooper offers complete reconfigured compressor package solutions.

Our applications engineering team can take your new application conditions and determine what is required to get the optimum utilization of your existing equipment.

Cooper reviews your current equipment and determines what is required, including new compressor cylinders, vessels, cooler sections, etc. to meet your current needs.

Advantages

- › Lower initial cost vs. new equipment
- › Quicker return on investment
- › Increased production
- › 100% utilization of available horsepower
- › No need to transport unit
- › OEM components ... same renowned Ajax reliability
- › One year warranty

LEGENDS DON'T STOP. WE MAKE SURE OF IT.™
