

SCREW IN PRE-CHAMBER

AJAX™ TWO-CYCLE INTEGRAL ENGINE-COMPRESSORS

Overview

The new Ajax screw-in pre-chamber (SIP) can be the first step in your emissions-reduction program by reducing NOx emissions. Adaptable to other emissions-reduction technologies, the SIP provides proven reliability for your Ajax medium-bore engine-compressors, reducing NOx emissions and fuel consumption.

Benefits

- › Reduced emissions and fuel consumption
- › Screw-in design to existing spark plug hole eliminates requirements for new cylinder heads
- › Easy maintenance due to water jacket cooling and fewer engine misfires
- › Standard spark plug utilized to ignite gas in pre-chamber
- › Corrosion resistance utilizing high-quality alloy steel
- › Easy conversion kit available for single- and twin-cylinder engines

Interchangeability

New device can be installed on all Ajax products with easily installed conversion kit available in one part number. Kit includes pre-chamber, piping, regulators and cooling water pump (if required).
