

WEST SERVICE SHOP

SERVICE AND SUPPORT FOR RECIPROCATING ENGINE & COMPRESSION EQUIPMENT

Cooper's Odessa, Texas service shop, parts distribution and warehouse offers a diverse array of services, including engine-compressor overhauls, cylinder rebuilds, compressor package refurbishment, and parts manufacturing.

Established in 1990, the Odessa service center specializes in engine and compressor repairs and overhauls for all the brands that Cooper services and is our center of excellence for the repurposing of compressor packages. The Odessa facility houses a wide variety of inventory for new and exchange engine components, including power cylinders, liners, pistons, and rods to help get you back up and running with reduced downtime.

Core Capabilities

The Odessa service shop is the Cooper west regional shop/warehouse for genuine O.E.M. parts and service, covering the following reciprocating compression and engine products:

- › Hytorc equipment
- › Optical/laser alignment
- › Customized field service trailers
- › Hydrostatic test bunker
- › Stress relief oven
- › Centrifugal grinder with 24" swing / 145" grinding length

Proven Results

An operator of Waukesha 7042 engines sustained a catastrophic failure. In response, the Odessa team dispatched a service crew immediately to tear down and inspect the unit in an effort to decipher the problem. The 7042 had sustained extensive damage to the crankshaft. It was brought to the Odessa shop for an overhaul that was completed in under two weeks. The Odessa team replaced the down unit overnight with a unit exchange (UX) engine from our swing engine inventory. Kudos to the Odessa team for supporting the customer quickly and efficiently.
