

# ENGINEERED CYLINDER SOLUTIONS

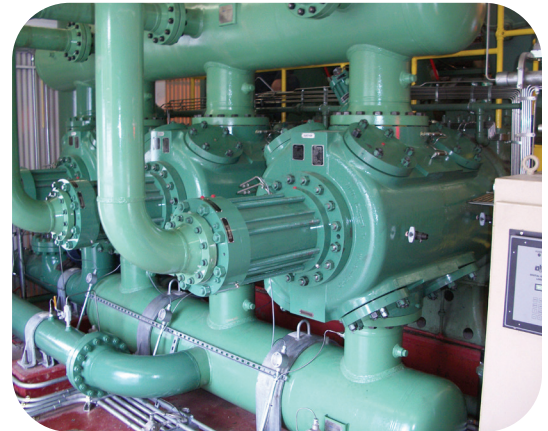

## ENGINEERED TO CUSTOMER SPECIFICATIONS

- › Lined or unlined
- › Air or water cooled
- › Application specific materials
- › Maintenance-friendly piston and rod assemblies
- › Sweet and sour gas designs
- › ACI or O.E.M. valve availability
- › Unloading and deactivation options

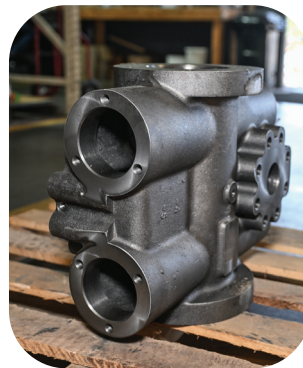

## ENGINEERED TO MINIMIZE INSTALLATION COSTS

- › New cylinder designs can often maintain the same center-line dimensions as the current cylinders, allowing existing bottles and piping to be reused as well as many other parts such as valves, unloaders, and piston and rod assemblies which reduce project costs.

## ENGINEERED TO SOLVE PROBLEMS

- › Increases efficiency
- › Eliminates structural weaknesses
- › Stops corrosion

**LEGENDS DON'T STOP. WE MAKE SURE OF IT.™**
