

LEASED COMPRESSION SOLUTIONS

Flexible Power, Delivered Fast

Overview

Cooper Machinery Services (Cooper) offers leased compression solutions built on the same engineering discipline that stands behind Cooper's AJAX®, Gemini®, and Superior® product lines. Leased units give operators a way to add horsepower quickly, manage variable production needs, and avoid a large upfront capital investment, all backed by Cooper's field service, parts, and engineering support.

Whether the need is bridging a temporary production gap, adding capacity ahead of a permanent installation, or supporting a project for a defined term, Cooper's leased compression program is built to get reliable equipment into the field fast, with the support you expect.

Applications

Cooper's leased compression solutions support various oil & gas and industrial applications, including:

- › Wellhead and production compression
- › Gas gathering and gas lift
- › Midstream compression and boosting
- › Bridge power during turnarounds, outages, or installation of permanent equipment
- › Peak-demand and seasonal load support
- › Remote and off-grid production sites

Leased AJAX® DPC-2802 LE Integral Compressor Package

Key Benefits

Leasing compression from Cooper is designed to reduce risk and simplify planning for operators of all sizes:

- › **Preserve capital** - Convert a capital equipment decision into a predictable operating expense, freeing capital for other priorities.
- › **Faster time to production** - Deploy compression on a shorter timeline than a new-build purchase, helping operators respond quickly to changing field conditions.
- › **Operational flexibility** - Scale horsepower up or down as production volumes, well performance, or project scope change.
- › **O.E.M.-backed reliability** - Leased equipment is built, packaged, and maintained to the same standards Cooper applies to the AJAX®, Gemini®, and Superior® units.
- › **Full-service support included** - Field service, preventative maintenance, and parts availability are built into the lease relationship.
- › **Simplified budgeting** - Predictable costs and reduced ownership risk make it easier to plan around production and project timelines.

What's Included?

Cooper structures each leased compression package around the customer's application, with support available across the full term of the agreement:

- › Application engineering and equipment sizing to match the job
- › Reciprocating compressor packages across a range of horsepower classes
- › Rig-up and commissioning
- › Preventative maintenance and field service for the duration of the lease
- › Parts availability when you need them quickly
- › 24/7 technical support and Rapid Response services
- › Flexible end-of-term options, including extension, purchase, or return, structured to the agreement

Complete Lifecycle Support from Cooper

Cooper provides end-to-end support throughout the life of a leased compression agreement:

- › Engineering and application sizing
- › Manufacturing and packaging
- › Installation and commissioning
- › Field service support
- › Preventative maintenance
- › Performance optimization and upgrades
- › Parts availability

Cooper delivers more than equipment; we provide solutions backed by expertise. With a focus on reliability, performance, and customer centricity, Cooper ensures your leased compression package operates at peak efficiency for the life of the agreement.

Diverse Equipment Offerings

Cooper offers a wide range of equipment, including but not limited to:

AJAX® Leased Compression Equipment

DPC 60 HP Integral Compressor
DPC 80 HP Integral Compressor
DPC 115 HP Integral Compressor
DPC 160 HP Integral Compressor
DPC 180 HP Integral Compressor
DPC 185 HP Integral Compressor
DPC 230 HP Integral Compressor
DPC 360 HP Integral Compressor
DPC 384 HP Integral Compressor
DPC 2801LE Integral Compressor
DPC 2802LE 384 HP Integral Compressor
DPC 600 or DPC 2803LE Integral Compressor

CAT Leased Compression Equipment

3304NA Engine with GE or Ariel Compressor Frame
3306NA Engine with GE or Ariel Compressor Frame
342NA Engine with GE or Ariel Compressor Frame
3306TA Engine with GE or Ariel Compressor Frame
3406NA Engine with GE or Ariel Compressor Frame
3406TA Engine with GE or Ariel Compressor Frame
379NA Engine with GE or Ariel Compressor Frame
379TA Engine with GE or Ariel Compressor Frame
3408TA Engine with GE Compressor Frame
398NA Engine with Worthington or Ariel Compressor Frame
398TA Engine with Ariel Compressor Frame
3512TALE Engine with GE or Ariel Compressor Frame
399TAA Engine with Worthington Compressor Frame
3516TALE Engine with Ariel Compressor Frame
3516TALE AFR Engine with Ariel Compressor Frame
3516TALE Engine with Gemini Compressor Frame
3608TALE Engine with Ariel Compressor Frame
3606TA Engine with Gemini Compressor Frame
3606TA Engine with Ariel Compressor Frame

Waukesha Leased Compression Equipment

VRG 330 Engine with GE or Ariel Compressor Frame
1197 Engine with GE or Ariel Compressor Frame
3521 Engine with White Superior® Frame
